

PACKAGE 5: ABOVE GROUND POTABLE RESIDENTIAL/COMMERCIAL

Package 5 is designed for potable water (drinking water) in a large residential or small commercial building with above ground storage. This package is ideal for all potable needs inside the building. The purification kit treats water to drinking water standards. Each filter will filter up to 5,500 sq.ft. of roof area. Multiple filters and tanks can be installed for a larger roof area and larger storage capacity.
